

Project Review System - Final Report

Team: Team 1

Date: 21-06-2025

Abstract:

This document serves as a test submission for the final report upload feature. The purpose is to verify that the file can be successfully uploaded by a student, viewed, and approved by the assigned guide.

1. Introduction

This section would typically detail the project's background, objectives, and scope. For this test, it confirms the initial step of the submission process.

2. System Architecture

This section would contain diagrams and descriptions of the system's design. This test confirms the file data is transferred and stored correctly.

3. Conclusion

This test will be considered successful if the guide can approve this document and the status is updated for all team members.
